## PROFILE

---

Experience building web and mobile applications end-to-end. I use JavaScript and TypeScript on both the front-end (React, Angular) and the back-end, along with C#/.NET Core and ASP.NET Core; mobile with Flutter. I integrate REST APIs and SQL Server, PostgreSQL, and MongoDB databases, applying SOLID principles and Docker to deliver scalable, maintainable software.

## TECHNICAL SKILLS

---

**Languages:** C#, TypeScript, JavaScript, SQL, Python

**Back-end:** .NET Core, ASP.NET Core MVC, Django, Entity Framework, Node.js, Express, REST APIs

**Front-end:** Angular, React, Flutter

**Databases:** SQL Server, PostgreSQL, MongoDB

**DevOps & Infra:** Docker, CI/CD, Git & GitHub, Nginx / Caddy

**AI:** Integration of LLMs and AI tools into development workflows

## WORK EXPERIENCE

---

### Programmer Analyst · Full Stack Developer

Apr 2022 – Present

*Amadita Clinical Laboratory*

- End-to-end development of internal systems: back-end in ASP.NET Core and SQL Server; front-end in React, Angular, and TypeScript.
- Database and SQL query optimization to improve system performance.
- REST API integration and critical data migrations in the healthcare sector.

### Technical Support Intern

Mar 2021 – Jan 2022

*Sistemas Integrados de Informática (SII)*

- User technical support, equipment maintenance, and software configuration.
- Diagnosis and resolution of system and hardware incidents.

### Freelance Developer

Nov 2025 – Jan 2026

*IKey Technologies*

- End-to-end development of custom websites and applications for clients.

## KEY PROJECTS

---

### BackOffice System / ERP Modules *ASP.NET Core · SQL Server · React · TypeScript*

Internal administrative platform for managing laboratory processes, with ERP-style modules and internal web applications.

### Finance & Cash Management System *ASP.NET Core · SQL Server*

Finance and cash-reconciliation modules: payments, transaction reconciliation, and financial reporting.

### Amadita Mobile App (Flutter) *Flutter · Dart · REST APIs*

Cross-platform mobile application built with Flutter, integrated with the laboratory's REST services.

### Clinical Data Migration (legacy system → PostgreSQL) *Node.js · SQL Server · PostgreSQL*

Deduplication logic to ensure patient identity integrity.

### SQL Reporting Engine Optimization *SQL Server*

CTE rewriting, indexing, and performance diagnostics.

## EDUCATION & TRAINING

---

**Associate Degree in Systems / Software Development** — Instituto Tecnológico de Las Américas (ITLA)

**Advanced English** — Instituto Cultural Dominicano Americano

**English: advanced conversation and grammar** — Cincilingua Inc.

## COURSES & CERTIFICATIONS

---

**Scrum Fundamentals** — Basic Scrum certification

**Introduction to Front-End Development** — Coursera certification

## SOFT SKILLS

---

- Teamwork and effective communication
- Complex problem analysis and resolution
- Working under pressure and meeting deadlines
- Management and prioritization of multiple tasks
- Adaptability and continuous learning

## LANGUAGES

---

**Spanish** (Native) • **English** (Advanced)
